SUMMARY

Innovative and results-driven Software Engineer with a deep passion for solving complex problems and building scalable solutions. Dedicated and committed to continuous learning, I approach challenges with determination and a strong work ethic. As a competitive programmer, I thrive on challenges, pushing myself to find efficient solutions and constantly improve my skills.

EXPERIENCE

Backend Development Intern, Eskalate

July 2024 - Present

- Developing and maintaining backend systems using Go (Golang), focusing on building scalable and efficient RESTful APIs.
- Enhancing backend architecture to improve performance and reliability across various services.
- Working closely with frontend developers and product teams to implement new features and ensure smooth integration.
- Engaging in ongoing learning to stay updated with the latest Go frameworks and best practices.

React Developer and QA Engineer, Ashewa Technology Solutions

Oct 2024 - Dec 2024

- Designed and implemented dynamic, user-friendly interfaces using React and Tailwind CSS for the fintech platform Abronet.org, streamlining the traditional Equb concept.
- Conducted rigorous testing of web applications to ensure they met high standards for performance, usability, and cross-browser compatibility.
- Worked closely with a multidisciplinary team, including designers and backend developers, to integrate new features and ensure seamless user experiences.

EDUCATION

Addis Ababa University, Bachelor of Software Engineering

June 2022 - Present

- CGPA 3.99
- · Key Courses:
 - Web Design and Development: Learned to design, develop, and deploy websites using modern web technologies.
 - Mobile App Development: Developed mobile applications using frameworks like Flutter, focusing on user experience and cross-platform compatibility.
 - Data Structures and Algorithms: Mastered essential data structures and algorithms for efficient problemsolving in software development.

A2SV (Africa to Silicon Valley), Competitive Programming

Feb 2023 - Present

- Solved over 630 LeetCode problems, demonstrating proficiency in data structures, algorithms, and problemsolving under time constraints.
- Engaged in regular competitive programming practice to refine algorithmic thinking and coding efficiency.

SKILLS

- Programming Languages: Proficient in Go (Golang), JavaScript (Node.js), C#, Python. Experienced with modern web technologies including React and Material UI.
- Backend Development: Expertise in building RESTful APIs, clean architecture, microservices architecture, and using frameworks such as Express, Gin, ASP.NET and Django.
- Security: Knowledgeable in implementing authentication and authorization mechanisms, including JWT, and handling security best practices in application development.
- Soft Skills: Strong problem-solving abilities, effective communication, and collaborative team player.
